

# SOMIN PARK

661-575-5051(US) | 010-9155-5375(KR) | [mia.p@wustl.edu](mailto:mia.p@wustl.edu) | <https://github.com/MIApark2355>

## EDUCATION

---

**Washington University in St. Louis**, St. Louis, MO

**August 2022 - Present**

McKelvey Engineering: Computer Science Major (Dean's List)

Honors: Tau Beta Pi

Relevant Coursework: AI for Health, Data Mining, Rapid Prototype Development, Intro to HCI, Computer Engineering

**University of Pennsylvania**, Philadelphia, PA

**August 2021 - May 2022**

Special Program: International Guest Student Program (non-degree program)

Relevant Coursework: Programming Languages and Techniques, Statistics

**Konkuk University**, Seoul, Korea

**March 2020 – July 2021**

Konkuk Institute of Science and Technology: Systems Biotechnology Major

Relevant Coursework: Introduction to Systems Biotechnology, Biostatistics, Problem Solving Through Programming

## TECHNICAL SKILLS

---

**Software**: Java, Python, Tensorflow, TypeScript, Next.js, JavaScript, React, Node.js, d3.js, Swift, R, HTML, CSS, PHP, AWS, MongoDB, Firebase, Express.js, jQuery, C++, SQL, Google Cloud Storage, Google Analytics, Figma, Linux, Git, Arduino

## RELEVANT EXPERIENCE

---

**Research Assistant**, Washington University in St. Louis

**August 2023 – present**

*Under the guidance of Professor Caitlin Kelleher*

- Designed and developed a Visual Studio extension to enhance developers' ability to trace code histories, interactions, and changes.
- Implemented visualization features to visualize code changes, branching, and collaboration history directly within the IDE.
- Developed test scenarios and user personas and supported the user testing process by observing sessions and providing feedback to improve the interface's usability and functionality.

**Project - ICP Predictive ML Model**

**February 2024 - Present**

Description: Developed a non-invasive machine learning model to predict intracranial pressure (ICP) utilizing waveform data from the MIMIC-III clinical database.

- Preprocessed large-scale clinical datasets and conducted feature extraction and engineering.
- Developed predictive algorithms to improve patient diagnosis and treatment monitoring.

**Project - BeThere (iOS App Development)**

**August 2023 - November 2023**

Description: A mobile app aimed at tackling tardiness and promoting punctuality in gatherings and meetings

- Integrated a database system to store and manage event-related data, allowing for efficient retrieval, modification, and presentation of event details on the user interface
- Implemented GPS and real-time tracking features to ensure on-time arrivals

## INTERNSHIP AND LEADERSHIP

---

**EDUrain**, St. Louis, MO, United States (remote)

**May 2023 - August 2023**

*Software Engineer Intern and Tech Lead*

- Managed code review process and pull requests, ensuring code quality and adherence to best practices.
- Deployed websites and oversaw the website deployment process to production environments.
- Assisted and mentored other interns in debugging issues and providing technical guidance.
- Implemented Google Tag Manager, Hotjar, and Google Analytics to track website usage and gather valuable insights.
- Developed Frontend and Backend for multiple redesigned websites based on Figma files, utilizing TypeScript, React, Next.js, and CSS to create responsive and user-friendly web interfaces.

- Tested drug efficacy using hair neogenesis and wound closing of mice models through in vivo research.
- Investigated drug efficacy of primary cell culture and cell line using invasion assay, migration assay, colonization assay, MTT assay and ELISA through in vitro research.
- Analyzed data from the results using data recording and analyzing software, image reading software, multiplate reader software, and data acquisition software.

**Teaching Assistant, Washington University in St. Louis**

**January 2023 – present**

Course: *Data Structures and Algorithms, Object Oriented Programming, Intro to Data Science, Introduction to Computer Engineering*

- Provided essential support and feedback for students to understand the course material and held scheduled office hours to assist students.
